Bason's Coffee Descriptions

DCDC Blend is smooth, medium blend of a few coffees. This blend was created initially for the specialty coffee shops that Bason's Coffee Roasting serves. This special blend is also characteristic of the Danville Ironmen; full bodied and smooth.

Smitty's Blend was created by our own Mike Smith. This mild blend is extremely flavorful and is a favorite at our shop.

Brazil Swiss Water Processed Decaffeinated coffee has its origin in coffee growing regions of Brazil. This decaf is a moderate roast with a medium body, a bright sparkling aroma and unsurpassed consistency with a silky, delightful aftertaste. Even though it is a decaf coffee, the taste is outstanding. Most decaf coffee is decaffeinated with methylene chloride, which can leave an unpleasant aftertaste. NOT this coffee. The Natural process removes the caffeine and leaves behind all of the flavor. Serve this to your friends and they will most likely not even know it is decaffeinated.

All Flavors in BC-Kup is our blend in BC-Kups. **BC-Kup** single serve kups for use in Keurig® type machines. An environmentally friendly alternative for your single serve needs. The BC-Kup and filter is made of recyclable plastic unlike the K-Cup®. Since the filter is built into the side of the BC-Kup, the water swirls around inside to increase coffee extraction and gives you a better cup.
